Stephanie:

The supplier does not send them "pre-cleaned", and we would need to send to AP, pay to have them cleaned, then ship to Axys which would delay getting them shipped to Axys

We can send them to AXYS via direct shipment but they will not be pre-cleaned. Then Axys could clean them using a methanol rinse, air dry which is the procedure for the 0.7 um filters.
I would suggest we direct ship to Axys and they clean,

Hi Rob,

Please go ahead and order the filters, as soon as possible, and send 4 pre-cleaned ones to the address provided below.

Thanks,
Stephanie

Eugenia an Stephanie:

I discussed this with AECOM and AP; these 25 um cellulose pre-filter were an option we were proposing to EPA based on the results of the field trial. We did not have approval from EPA to use it yet, and have not ordered any.

So while we tried all avenues, AECOM and subcontractors do not have any 25 um filters to send to EPA if

you would like we can order them.

My apologies that we can provide you any immediately.

We are working on it....

>>> Eugenia Naranjo <Naranjo.Eugenia@epamail.epa.gov> 8/17/2012 9:20 AM >>>

Rob, Bill, Kristen,

Axys contacted the CPG vendor to order the 25 um filters, and it will take 7 days for filters to arrive. Would it be possible for the CPG ship four of your pre-cleaned 25 um filters to Axys -today- to keep this moving? You can use LBG's FedEx tracking number 306770276 for the overnight shipment.

The coagulant blank should include the 25 um filter because it is a cellulose-wood filter, not a glass fiber filter. If you have any questions you can contact AmyMarie (Stephanie's out today and I'm officially off but checking emails). Please let us know.

thanks,

Please send filters to:
